

MONITOR GEOENGINEERING EXPERIMENTS AROUND THE WORLD

June 23, 2023

The interactive world map on geoengineering provides an overview of existing, planned, completed, and cancelled geoengineering projects, experiments, and research. Prepared by the Heinrich Böll Foundation and ETC Group, the map provides a jumping off point for research on the alarming expansion of geoengineering research and experimentation.

If you'd like to learn more about the map and how it was designed take a look at our [Geoengineering Map Explorer](#)
