

New briefing: Why are Solar Radiation Management Experiments a Bad Idea?

April 5, 2017

by [ETC Group](#).

A new [briefing](#) from ETC Group outlines the ethical, political and environmental arguments against solar radiation management (SRM), and explains why even SRM *experiments* are a bad idea. The backgrounder was released in late March 2017 after Harvard University [announced](#) they are planning open-air SRM experiments in Arizona in 2018. Read the briefing and related materials at: <http://www.etcgroup.org/content/why-srm-experiments-are-bad-idea>

ETC Group also issued a [news release](#) and supporting materials explaining how the new US administration could “inflate geoengineers’ balloon” and create favourable circumstances for geoengineering experiments now and in the future.
